

INLINE FLAME ARRESTERS

ASHCOR

ASHCOR's series of industrial flame arresters are built to protect your site operators, site equipment and budget.

Each product within the ASHCOR Series 7000, 700 and 730 is made of high-quality, durable metals with a unique, non-welded element, resulting in low pressure drop and allowing for maximum flow. Bi-directional configuration offers simple and accurate vertical or horizontal installation, and removable elements allow easy cleaning and service.

INTERCHANGEABLE WITH EXISTING INDUSTRY STANDARDS

The ASHCOR Series of industrial flame arresters are designed to withstand harsh conditions and add an extra level of safety in various oilfield applications.

Single element design and a removable core on some products allow for easy cleaning and service. ASHCOR flame arresters are available for purchase as standalone products, and are also included in our standard flaring packages. Contact the ASHCOR sales team for assistance to purchase the right flame arrester for your site needs, worry-free.
